

Poster submission guidelines

The digital version of a poster should be submitted in PPT or PDF (2–4 slides with the additional introductory slide) by **Monday, 4th September**. The introductory slide should include the full name, contact email, and name of the represented institution.

An abstract should be submitted alongside elaborating on the poster's content. Abstract requirements are as follows:

- The abstract should be submitted in a separate PDF file that should have the same file name as the poster title;
- The abstract should be relevant to life sciences and should not be promotional;
- The length of the abstract should be 200–250 words (+/- 10%);
- It is advised to avoid using references in the abstract. The abstract should be focused on the original research instead of the work of others;
- The abstract should be revised before submission as it will be put up for evaluation as received.

Poster evaluation criteria can be accessed [HERE](#).

The „Life Sciences Baltics“ content committee will evaluate posters and abstracts. It will select **9 winning posters** whose owners will be invited to present their work in-person during the „Life Sciences Baltics“ event in Vilnius, Lithuania, on **20th September**.

- The presentation based on PPT will be limited to 6 minutes with 2 additional minutes dedicated for Q&A;
- Owners of the winning posters will receive a full two-day pass to the „Life Sciences Baltics“ event.

Owners of the winning posters will be announced on **Friday, 8th September**, on the event's [website](#) and [LinkedIn](#). Additionally, they will be notified individually by email. Upon the announcement, a complete evaluation table with points scored will be published.
